

## Circular Saw Blades

Professional maintenance circular saw blades with hardened center plate and modified thin kerf. This combination allows the blade to cut straighter with less resistance (faster) and leaves it cleaner. The carbide tips are sintered carbide and provide maximum cutting hardness with impact resistance.

### 7-1/4" Professional/Maintenance Grade

Code #	Teeth	Arbor
803-7-1018	18	universal / (5/8")
803-7-1024	24	universal / (5/8")
803-7-1040	40	universal / (5/8")

## Specialty Cutting Blades

### 7-1/4" Non-Ferrous Metal Cutter

For cutting all types of non-ferrous metals such as aluminum, brass, copper and lead.

Code #	Teeth	Arbor
803-7-1340	56	universal / (5/8")

### 7-1/4" Silicone Coated Treated Lumber Cutter

Silicone coated for pressure treated lumber— reduces friction and resin build-up.

Code #	Teeth	Arbor
803-7-1424	24	universal / (5/8")

## Smaller Blades - Rechargeable Saws, Air Tools, and Others

### 6-1/2" Circular Saw Blade

Code #	Teeth	Arbor	General Use
803-7-2020	18	universal / (5/8")	ripping and framing woods
803-7-2040	40	universal / (5/8")	smoother cut for trim and finish

### 5-1/2" Circular Saw Blade

Code #	Teeth	Arbor	General Use
803-7-3024	24	universal / (5/8")	smoother cut for trim and finish

### 5-3/8" Circular Saw Blade

Code #	Teeth	Arbor	General Use
803-7-4020	18	10mm	cutting wood
