

Cryo-Thunderburr

At first glance, Cryo-Thunderburrs look like ordinary burrs, but look closer. Cryo-Thunderburrs incorporate an alternating series of coarse-cut teeth and fine-cut teeth. This patented design is simple yet revolutionary. The coarse teeth promote faster cutting and the finer teeth improve the surface finish, and the combination reduces chatter.

- Coarse & Fine Teeth – faster cut, smoother finish, less chatter
- Cryophase™ Treated – maximum life & improved durability
- Available in 3 assortments
- Available Head Diameters – 3/8" and 1/2"
- Both diameters available in 6 head shapes

SPECIFICATIONS

Material..... Sintered cobalt-tungsten carbide
 Hardness..... 80 Rc (core)
 Cryogenic Treatment..... Cryophase™ Process
