

Battery Corrosion Preventatives

- Easy-to-use corrosion preventative for new and old batteries
- Formulated to make all surfaces impenetrable to corrosion-causing acid fumes which reduce battery life and cranking ability
- This product is applied to battery terminals, cables, hold-downs, enclosures, boxes, carriers and is guaranteed for the life of your battery when used as directed

SPECIFICATIONS - Liquid

Coverage40 in ²
Appearance & Odor	Red, lubricant-like
Solubility in Water	Negligible
Boiling Range	550° F/ 288°C
Flash Point	532° F/ 278°C
Stability	Stable

SPECIFICATIONS - Rings

Appearance & Odor	Gray, lubricant-like coating on felt rings
Solubility in Water	Negligible
Boiling Range	550°F/ 288°C
Flash Point	532°F/ 278°C
Stability	Stable
Shelf Life	Unlimited

Code #	Description
413-1-0150	Brush-On Battery Corrosion Preventative - 4 oz. can (113.4g)
413-1-0050	Battery Terminal Protectors for Side Mount Posts - 50 per can
413-1-0100	Battery Terminal Protectors for Top Mount Posts - 100 per can

Rust Sponge™

Prevents Corrosion in Electrical Boxes

- A unique sponge that emits a vapor which combines with moisture and air to prevent corrosion in closed switch boxes, electrical outlets, control panels, circuit boxes and many other electrical components
- Open the bag, peel the back and stick it up. In most applications, the sponge will give protection for one year
- One sponge gives one cubic foot of protection
- Leaves no residue

SPECIFICATIONS

Material	Air permeable foam with special vapor producing center
Approvals	Meets military spec MIL-I-22110B

Code #	Description
229-0-0000	Rust Sponge
