

## Partsmaster™ Fractional Drill Bits

- 135° split point provides for less feed pressure when drilling and is self-starting without center punching or using pilot holes (1/8" and larger)
- High moly tool steel for durable cutting edge for drilling steel, stainless steel, nickel alloy and non-ferrous metals
- Black and gold oxide finish holds lubricant
- 3 flats on shank won't slip in keyless chucks (1/4" and larger)
- Available individually and in a portable plastic index
