

## CORN COB LIGHT BULBS

Corn cob light bulbs are the perfect LED replacements for inefficient HID lights such as metal halide (MH) and high pressure sodium (HPS) bulbs. Known for the corn kernel like appearance of the “chips on board” (COB), these ballast by-passable bulbs are more efficient and last longer than traditional bulbs. Partsmaster’s corn cob bulbs are rated for indoor and outdoor fixtures, both enclosed and open.

### Features:

- 50,000 hour lifespan
- 80+ CRI rated
- 360° Beam angle
- EX39 Mogul base
- Ballast Bypass only, 100-277V 50/60Hz
- Power Factor >0.90
- 4° to 113°F (-20° to 45°C)
- Safety cable on larger sizes (80W and up)

### Benefits:

- 5-year warranty
- Utility rebate ready
- Instant start means no delay or flickering at start
- No dimming over time (no light decay)
- Over 110 lumens/watt efficacy
- Outstanding color quality
- No mercury or UV light
- Certifications: cULus, DLC, FCC, CE, RoHS
