

Cryo+Rescue Reciprocating Blades

- Cryo+Rescue thickness provides minimum deflection for more stable cutting in wider cuts
- Cryophase treatment allows for long cutting life
- Straight tooth pitch and optimized set pattern reduces vibration and operator fatigue
- 7/8" blade width for increase blade rigidity and allows for heavier feed pressure

Cryo+Rescue – Reciprocating Blades

Code #	Length x Width x Thickness	Teeth Per Inch	Uses
803-4-6010	6" x 7/8" x .062	10	Used for Vehicle Extractions/Door Post, Hardened Nader bolts and roof panels
803-4-6014	6" x 7/8" x .062	14	Used for Vehicle Extractions/Door Post, Hardened Nader bolts and roof panels
803-4-9010	9" x 7/8" x .062	10	Used for Vehicle Extractions/Door Post, Hardened Nader bolts and roof panels
803-4-9014	9" x 7/8" x .062	14	Used for Vehicle Extractions/Door Post, Hardened Nader bolts and roof panels
